## Vibrato Hand Dryer with HEPA filtration

### SPECIFICATIONS

★ Product code	CL-00143(SS) CL-00144(White) CL-00143-DE(Black)
★ Dimensions	300mm x 252mm x 169mm
★ Finish	Stainless steel & SS powder coated
★ Air velocity	75 m/s
★ Air Volume	85 m3/h

Strong airflow

Low noise

Intelligent Temp control

Compact size

### PRODUCT DESCRIPTION

This is a new generation high speed hand dryer, activated by infrared sensor with intelligent temperature control function. The Vibrato Hand dryer is a fantastic addition to any bathroom with features like HEPA filtration, superb durability and superb energy efficiency. Its intelligent temperature control function automatically adjust to the surrounding ambient air temperature, so you get comfortable, warm air in the winter and energy savings in the summer. The HEPA air filtration system removes dust and bacteria delivering pure clean air to the hands.

### FEATURES

- Rated power - 0-800 watts (Intelligent)
- High grade stainless steel body
- HEPA filter fitted to remove 99.5% of bacteria
- 18000 RPM, Brushless DC motor
- Touch free infrared sensor activation
- Voltage - 220V-240V~50Hz
- Noise level - 70DB at 1 minute
- Weight - 3.3kg

### BENEFITS

- Robust, high impact resistant
- Auto-stop function, built in timer stops the unit after 60sec
- Energy saving
- Round nozzle for concentrated air flow for quick drying
- Expert energy conservation with realtime temp monitoring

### MOUNTING HEIGHT RECOMMENDATIONS

- Men 120cm, Woman 108cm, Handicapped 94cm
- \*Measurements are based from the floor to the bottom of dryer

Tempo dryers feature Intelligent Temperature Control technology, to make these our most efficient, environmentally friendly dryers yet. When the washroom's ambient temperature is warm, the heating system automatically switches off. When the ambient temperature is cooler, the heating system automatically switches on again. The temperature of airflow adjusts between 20-40 degrees saving power and the environment.

**What is a HEPA filter?** HEPA = High efficiency Particulate Air. It works by forcing the air through fine mesh which traps harmful particles. They are used in a wide range of applications from filtering the recirculated air in planes to protecting doctors working with contagious patients. They filter pollen, smoke, dust mites, airborne bacteria by trapping them and restricting them from entering the internal components and airflow of the dryer.

### What are Important factors to consider when purchasing a hand dryer?

#### Wattage

Electrical consumption and rated motor power - the lower the wattage the more environmentally friendly

#### Airspeed

The speed by which the air gets pushed through the dryer will impact effectiveness and dry time

#### Air volume

The volume of air moved per hour

#### Spares

All our Hand dryer spares are generally readily available for repairs within our technical department

#### Warrantees

Our hand dryers are supported with a specific warranty period per product and repairs are done on site in our technical department.

### Hand dryer certification

Our range of hot air dryers offer an economical and comprehensive range of dryers to suit various installations. We have consistently strived to create durable and environmentally friendly products that are engineered with the most prestigious standards in mind. Every dryer within the the range goes through extensive testing annually to receive NRCS certification. The NRCS is the National Regulator for compulsory specifications as an independant from the original regulatory division of the SABS. The NRCS enforces compulsory specifications to protect the consumer and serves as the community watchdog regulating the industry.
